Raquel:

This is an urgent request since you as a Broward County School District have an EYE WITNESS as to what the shooter looked like when firing a barrage of bullets down the hallway killing a Teacher Scott Beigle and injured Stacy Lippel.

Stacy Lippel suffered a gunshot injury and therefore by Florida law is required to fill out a first Injury Report for Workers Compensation.

She needs to be send to your Workers comp doctor for tetanus shots.

She needs the Broward County School Safety Department to protect her by making sure that she files criminal charges with the Broward County Sheriffs office against the shooter that killed Scott Beigle and shot her in which she describes in detail.

If she does NOT document these issues then it never happened as they say in our school work place.

You are Public Relations and I am assuming that the school superintendent and all of the school board members have reached out to Stacy Lippel by extending her well wishes for a speedy recovery?

If NOT then you need to make that happen quickly.
