Electronic records should be produced in their unlocked native format with all original metadata and original filenames, except that you should contact me regarding the format of production of any database records to discuss how those records can be produced in a form comprehensible to persons lacking knowledge of computer language. Paper records should be scanned and produced as PDF files and should include a scan of the file folder labels from which the records were taken.

Please deliver the records by email to me, or if that is not possible, through a file-sharing service such as Dropbox. Do not redact any non-responsive information from any records; we request the complete copies of any records with any responsive information. Please keep email families together; an email and all of its attachments should be produced so long as at least one of those is responsive. When searching emails, please search all folders, including inbox, subject matter folders, sent items, archived items, and deleted items. Please produce all metadata fields for emails, including BCC and all others. Please organize the production in such a way that we can tell to which request each record is responsive.

If you have any questions please contact me at 352-729-2559 or by email at [wolfgang.halbig@comcast.net](mailto:wolfgang.halbig@comcast.net).

Very truly,

W/H
